257 DAYS PAST

Saturday

100 TO COME

The Urgent Blood Requirement,

in profound anemic and chlorotic states, is the formation of a blood current of vital richness, with a sufficiency of oxygen-carrying hemoglobin. **Pepto-Mangan (Gude)** efficiently meets this urgent indication, by furnishing immediately absorbable iron and manganese in bland, non-irritant, organic combination.

Weather

Temp.

Cold this morning,
Girls took supper home with
them for dinner, then she
is going over to Altax for
for the Laura social.
John has been drawing
manure. Maude & I went
to Aylmer
