

2 **Friday, September 4**

248 DAYS PAST

WEDNESDAY

118 TO COME

Jan. 12, 1907.

Dr. McLennan, Honolulu, Hawaii, says:

"Many thanks for the beautiful and useful Bacteriological Chart. It reached me in good condition and I find it useful for comparison. Realizing the amount of patient toil and careful arranging to get up such a chart, I wonder at its being given away gratis."

Rained quite hard to
night. John was helping
Mark (help Mr Blake) stack
opts all day. Gals went
to school. I have been
raking & burning up
the chips all day.
Had a card from Mrs
Dance to night.
