235 DAYS PAST

131 TO COME

To End the Physiologic "Standstill."

A necessary element in the progress toward recovery from a prolonged illness is the enrichment and the restoration of the impoverished blood stream. **Pepto-Mangan (Gude)** tends to bring to an end the physiologic "stand still," by supplying to the depreciated vital fluid the ferric and manganic elements necessary to the building and rebuilding of red cells and oxygen-bearing hemoglobin.

Weather

Temp.

Hot as Sunday + Monday nearly.
Papa still just used our team because they go better alone than with another horse. Cut for about an hour in east field. The rest of forenoon cut oats in field north of house. Herb was here for dinner and went home right after dinner. Maude rode wheel to town to get some hypo, a film some printing paper and most of all a letter from mother. Got letter from mother with lace in. Shed was here for vinegar this morning. Captain Light was buried to-day. Cecil brought film over to-night. Having a nice little shower to-night. Washed this morning. Brought clothes in to-night but didn't sprinkle them. Mariah wasn't driven.
