330 DAYS PAST

35 TO COME

Treatment of Epistaxis.

With patient sitting in chair, stand behind him, place index fingers of both hands beneath body of lower jaw on each side, with thumbs resting behind angles, and make gentle traction upward upon the head, and simultaneously extend it backward as far as patient can comfortably bear. This sets up artificial anemia in nose and head in general, causing epistaxis to cease. Desist in one or two minutes, or consciousness may be lost.

Weather

Temp.

A very warm day
warm enough to for the bees
to be out. Eugene came over
& helped us pick thirty hives
sold twenty nine got sixteen
60 for them. Maudie & Stella
are staying down at Mr
Abell's with the girls all night
& drove Billey to Caplmer

Mariah to Billey to Polley 1/2
