

Rich Red Blood

is the main desideratum in many cases—richness of the circulating fluid in those important basic elements of vitality—*hemoglobin* and *oxygen*.

Pepto-Mangan ("Gude")

infuses this desirable richness in cases of Anemia, Chlorosis, Amenorrhœa, Dysmenorrhœa, Rickets, Bright's Disease, etc., by furnishing the necessary hemoglobin-carrying elements—iron and manganese—in a form for almost immediate absorption. Repeated "blood counts" as well as clinical experience go to prove this statement.

Sold in eleven ounce bottles only. Never in bulk.
