159 DAYS PAST

206 TO COME

The True Tonic.

Any agent which will aid the blood to carry and distribute oxygen is a true tonic. Iron is such an agent. Of all forms of iron, none is quite as generally acceptable, tolerable and assimilable as **Pepto-Mangan (Gude)**. It creates appetite, tones up the absorbents, and builds the blood, and is thus a real tonic and reconstructive of high order. **Pepto-Mangan (Gude)** never constipates.

Weather

Temp.

Warm one of the warmest days I ever saw. Mella wheeled to school. Maudie was so ill to go had the Dr out at five in the evening & he says that I will have to keep her there for three weeks. It was so warm that Mella had to ⁺ say to Auntyelines until the sun went down. Eugene planted that little field down by the woods & John sheared the sheep in the afternoon.
