

Digging the two outside rows to see if there is any difference between the fertilized and unfertilized but I can't see a particle they are all beauties and a lot of them. Dad worked on the land all day and Frank has been off thrashing with Alan & Sam. he is having a beautiful time as Alan lets him run the engine. I went down town to night with Aunty Alice's milk.

Wednesday September 15th

It was very foggy this morning and I didn't go out very early to dig potatoes but got four more bushels. I went back at noon and helped Dad take the harrows back. Dad worked on the land all day and Frank has been helping Alan & Sam. Fine day. Aunty Alice was over to tea to night.

Thursday September 16th

Dad finished fitting the wheat ground to-day and has it in fine shape. I finished digging the potatoes in the garden at noon and got 11 bushels. This afternoon I went over to the Prestons and helped old Walker clean up 8 bushels of seed wheat for our selves. Enah was down all day judging at the flower show. There was very little there considering the good year it was for every thing. I went down to night and found the band playing at there so went back to Aunty's and got my hair. Fine & cold wind.

Friday September 17th

Dad and Frank have been all day and part of the night putting in the wheat. They had to haul the Bowie sled back first thing this morning. then go over to Prestons and get the wheat. Chain the drill to the back of the wagon and haul it around to the gully gate on the side. would take the wheat up and un-load it and then go back after the drill so it was about eleven o'clock or after when they started to drill. It took two of them as the sled is too heavy for one to handle alone and watch the team too. They kept at it till eight o'clock to night but finished the field. I did a few odd jobs this morning and went back as soon as I had my dinner to watch the cattle out of the field while Dad went up to get his and then I stayed back there with Frank when he come back till Dad arrived. When I got up to the house I found two coats of Blading Heart that Mary had sent me so I put them on and then hurried over to tell Arthur Pickford that the boys were going to leave Frank Smith's store at 3:30 to go for a camp fire trip but he had decided not to go. I also cut some corn for the cows and then got ready and went down town. I picked up Gordon Zealand on the way down. He had just come on the five o'clock car from Hamilton. He was the only one of our bunch that showed up and only four of the Methodists. Manning took us down the Pups Shore in his car. and we built a big
