336 DAYS PAST

29 TO COME

Simple Treatment for Ringworm.

The diseased area is first washed with strong solution of sodium bicarbonate and swabbed with spirit of ether to remove grease. It is then painted with tincture of iodine and sprayed immediately with ethyl chlorid until the integument gets china white. The deeper the disease process the longer the spray must be applied. In ringworm of the scalp three or four applications may be necessary, but on smooth surfaces one application usually suffices.—Foley; Lancet.

Weather

Temp.

A fine day with a few snow flurries, snowed about two inches last night. John was over to Apilb Peoples Sale this afternoon. I was Cox Evelin & I was to Aylmer. Evelin got her a new pale blue dress. John put the new steps up down cellar.
