346 DAYS PAST

*Thursday*

20 TO COME

**Contraindications of Intravenous Saline Infusion.**

Dr. R. Berthelmann cautions against large saline infusions in general infections associated with cardiac weakness, because saline solutions tend to destroy the bactericidal properties of the blood. On the other hand, large intravenous infusions are permissible in peritonitis with paralysis of the vasomotor centers, provided the heart is still intact.

**Weather**

*Cold*

**Temp.**

*snowed some last night  
John went to school  
St. Thomas with Mr  
Cox & Cecil, got to  
Kino for Grace & Gene  
Appleford, Melba & I  
went to the school winter  
tournament & it was so  
slippery we had to get old  
Billy Chad, it was eleven  
at night - before they got  
him finished the way  
to Mrs. Helms. Bley 5 - Mar 5*
