Thursday
July 8th Beautiful day - Charles told me in the morning that he had got quite a jolt in a letter he received from Dr. McLaughlin of Hamilton who said that the X ray plate of his ankle showed signs of hardening of the arteries. Of course one hopes he will prove to be wrong. I have had it following me as a shadow all day. Dr. Ramme is away this week for a holiday. Went down for break. Came home, then went to Mrs. Caldwell's and went to enquire how Mrs. Annie Inler got home. She had a good night. Called at the house to give Mr. Iner the Forward Movement report. Did some weeding in the seed beds.
