

Thursday, December 17

351 DAYS PAST

14 TO COME

**The Experienced Physician**

appreciates an "iron need" in the peculiar pallor of the skin and mucous membranes of the chlorotic subject. Such an iron need is best supplied in the form of a palatable, tolerable, non-irritant, easily assimilable ferruginous compound, **Pepto-Mangan (Gude)**. This organic combination of iron and manganese meets every indication, without disturbing digestion or producing a constipated habit.

**Weather**

**Temp.**

Mrs Charlie Clarke  
in Ayler. entertained  
a number of ladies  
I walked down to Maude  
Thompsons & Boyd drove  
her & I out - then we  
came home with the  
girls about eight. John  
was at Eugene all day
