72 DAYS PAST

T U E S D A Y

294 TO COME

The Early Recognition of Cancer.

CARCINOMA OF THE UTERUS. Irregular metrorrhagia, accompanied by an offensive watery vaginal discharge, occurring in middle-aged women whose menstruation has ceased or become atypical, or bleeding which occurs on coitus or exertion, are indications of malignancy.

CARCINOMA OF THE BREAST. Any growth in the breast of a woman of middle age is best considered and treated as malignant.—Levin; Archives of Diagnosis.

Weather

Temp.

Thawed but windy
& very smoky to night.
Girls went to school John
drew manure this fore
noon, went to the lake this
afternoon, down to Mr Dan
Patterson with Albert, Mrs
George Davis borrowed my
quilting frames & thumb
screws. I have been
making Melbas crape
night-dress
