

Sunday, May 7

128 DAYS PAST

TUESDAY

238 TO COME

Geriatric Aphorisms—No. 12.

Pain is frequently absent in ordinarily painful diseases, such as peritonitis, appendicitis, gastritis, cholecystitis, pleurisy and pneumonia. (The aged often deny pain to avoid examination.)

A pain for which no cause can be found and which shifts its site from day to day indicates malingering with mental impairment.—*Nascher; Amer. Med.*

Weather

Rained hard

Temp.

had<sup>t</sup> night<sup>t</sup> & a little bit  
this morning. John drew the  
milk. Mr. Bruce was here, &  
got Aletas flour. Girls went  
to school & to night Melba  
& I went to Kinganville  
got a new pair of shoes  
a new print dress. I  
have been papering the  
summer kitchen all the time  
I had, think I can finish  
it tomorrow Billy & David &
