265 DAYS FAST

101 TO COME

An Urgent Indication.

Saline Infusion is often necessary when the blood volume is appreciably reduced, as a result of sudden hemorrhage. Subsequently, a corpuscle-building and hemoglobin-creating agent is urgently indicated. **Pepto-Mangan (Gude)** is the most easily tolerable, non-irritant and readily appropriate combination of organic iron and manganese, and is readily taken by patients of all ages.

Weather

Temp.

A fine day
but rained a little
about noon. Girls went
to school. Nella came
home but, Mrs. K. & Lucy
& Maude were here, & Maude
& Maude & Lucy here to night
John was to buy lumber & get
some lumber to make a gate
to hang on the south line
