268 DAYS PAST

97 TO COME

Endocarditis in Children.

Gilbert believes that acute endocarditis should be considered as acute for a longer period than has been the custom. Treatment should be carried out for months, perhaps for years, or until all signs of acute disease have disappeared, and even then until adolescence is passed, or at least a certain amount of restraint should be exacted.—*Boston M. & S. Journ.*

Weather

Temp.

Cold but foggy this morning
Girls went to Aples after
dinner & got Polly shod one
shoe. Mrs Lopez & Belin was
over this evening & John was
over here. John was cutting
corn all day. L. Layde Achar!
came & paid for the lumber
to night. - Maudie paid
the creek for the benches to day
Maudie & I planted the talips
Maudie & I Polly 5 bulbs.
