311 DAYS PAST W E D N E S D A Y 55 TO COME

Anemic Convalescents.

Patients who fail to respond to well directed dietetic and hygienic measures often show prompt improvement when Pepto-Mangan (Gude) is added to the treatment. This is especially true of anemic convalescents. The appetite is improved, absorption of food is encouraged and the nutrition is enhanced.

Weather

a lovely day

Temp.

Melba & I went down to Mrs Bingham's & got some more apples. Then after dinner we went to Kingmill, & got some print for quilts. John went to mill this morning & this afternoon, splitting wood. Maudie's ground has radish, for beet salad. John was over to Clarence Hayes to night
