185 DAYS PAST

180 TO COME

## The "Iron Need"

in Chlorosis, is unquestionable and is readily noted, by the practiced eye, in the peculiar pallor of the skin and mucous membranes. Such an "iron need" is best supplied in the form of a palatable, tolerable, non-irritant, easily assimilable compound, i.e., **Pepto-Mangan (Gude)**. This organic combination of iron and manganese meets every indication without injuring the digestion or inducing a constipated habit.

Weather

Temp.

Rather cool this morning  
Opening of the Baptist Church  
to day Maudie Mellas here. I  
went to church in the  
morning, then in the evening  
we all went. Eugene &  
Alta was there. Pa went  
for an out. & ride with  
Shed & Golger. Mellas here  
went also. Mariah to Billys-
