101 DAYS PAST

264 TO COME

A Valuable Tonic in Childhood.

Pepto-Mangan (Gude) is a very valuable tonic in childhood and unlike so many of the ordinary hematinics, can be given with impunity to the youngest infant. It is absorbed rapidly, and is never rejected by even the weakest stomach. In early life its administration is best effected by giving it in milk, and the dose should range from ten drops to two teaspoonfuls, according to age.

—Southern Calif. Practitioner.

Weather

Temp.

Since day only cloudy part
of the time I took Billy & went
to town & down to Harley Wright
mans. sale. was in at Mrs
leharley Clarke a little while
John & Eugene went down
with the milk wagon &
settled for the place for
night. Eugene & Carl went
to St Thomas, Aleta went
this morning & sold 120 eggs
Billy & Polly 17.
