213 DAYS PAST

WEDNESDAY

153 TO COME

Post-Septic Anemia.

Timely hematogenesis is required to repair the damage to the blood caused by septic infection and its devitalizing influence. Post-septic or post-suppurative anemia is usually quite apparent if the infection has been at all prolonged. Pepto-Mangan (Gude) is both prompt and efficient in blood building therapy and is always well taken, rapidly absorbed and readily tolerated.

Weather

Temp.

cold last night & to night - kelbas went & got Mr. White & are expected home all yesterday afternoon & all day not home been at it - today extracting & taking it of kelbas & took Mr. White home, was in at Ed Thompsons on our way home
