323 TO COME

Danger Signals of Cancer—(Continued).

(3) Cancer of the lip, mouth or tongue: The danger sign is a wart or sore that will not heal. If appearing after 40, it is practically sure to be a cancer.

(4) Cancer of the skin: The danger sign is a sore on any part of the body, which does not heal, or the rapid increase of growth in a wart or a mole, which may have been present for a long time. If these appear in an individual over 40, they are nearly always cancer.—Childe.
