

Saturday, November ~~16~~ 15

321 DAYS PAST

45 TO COME

As An Emergency Measure

saline infusion is often necessary, when the blood volume is appreciably reduced, as a result of sudden hemorrhage. Subsequently, a corpuscle-building and hemoglobin-creating agent is urgently indicated. **Pepto-Mangan (Gude)** is the most easily tolerable, non-irritant and readily appropriable combination of organic iron and manganese, and is readily taken by patients of all ages.
