

Like the Building of a House

When a man builds a house he takes care to first prepare a firm foundation. When a physician treats an anemic or chlorotic patient, he must first consider the "building of the blood," the fountain and foundation of healthy life.

Pepto-Mangan ("Gade")

supplies the necessary oxygen and hemoglobin-carrying elements and thus successfully builds from the foundation upwards in cases of Anemia, Chlorosis, Amenorrhœa, Chorea, Dysmenorrhœa, Bright's Disease, etc. In eleven ounce bottles only; never sold in bulk.
