24 DAYS PAST

341 TO COME

When and How to Use Nitroglycerin—No. 2.

The chief contra-indications to the use of nitroglycerin are (1) low or relatively low blood-pressure; (2) advanced chronic nephritis with very high blood-pressure and toxemic conditions producing high blood-pressure, as a rule; and (3) the presence of an idiosyncrasy in regard to its action.—*Cornwall; J. A. M. A.*

Weather

Temp.

Very cold this morning, but much warmer this afternoon. Louise was very ill last night, had two doctors with her all night. Melba & Coelin went to Sunday school. Maudie was not well. Then Coelin stayed for tea & then the mother & Cecile came for her. Eugene & Aleta were here this afternoon a little while. Eugene is better. Everything good.
