167 DAYS PAST

198 TO COME

A Positive Indication.

A Seattle physician writes: "I am not at all particular regarding the name of the disease, but when a patient consults me with a pallid, cold, clammy skin, colorless lips and purple finger nails, it is **Pepto-Mangan (Gude)** right there. That's usually all there is to it, unless I find some local lesion that needs attention."

Weather

Temp.

Warm John & Eugene went to the north place & Eugene came back with Mr. Hall and helped him catch his sheep & Goats. Then road back w^t with him. I went to Aylmer for a few minutes after medicine for Grandie got her a new camera & one 2 new aprons
