277 DAYS PAST

THURSDAY 89 TO COME

A Stimulus to Hematogenesis.

Iron and manganese, in organic combination, are the most efficient agents with which to encourage and stimulate blood construction. Pepto-Mangan (Gude) is the most eligible and available of such combinations, because of its palatability, ready tolerability and absorbability, and its promptly efficient hematinic action.

Weather

Temp.

Very a fine day
but quite a wind,
Maude Abell came this
morning to sew, Charles came
for lunch & night, John was
down all day helping shed
fill silo. Shilp Parker was
here cutting corn,
washed & Mella has been
making a rabbit pen
for old downah. I have
had Mauch out all day
