over there and helped Dad. haul out manure. I was late getting over as we didn't get in an extra good day. Frank Cooley informed us when he came home that he was going over to plough for Roy Hammond to-morrow as we would not be through with the manure so I went over again Tuesday and helped Dad. although I had figured on being home. Wednesday I didn't go over but as Queen's harness was over there I couldn't work the teams but just did odd jobs around here. Thursday being the King's birthday school was closed and Jim came over here with his rifle & shot ground hogs in the afternoon and I foolishly went with him so didn't get much done. Mary was very provoked at me. She was over at the Lamphiers all the afternoon as poor old Dave attempted again with his legs swelled up. Friday June 4th Dad brought the spreader over and we covered the corn ground putting it 8 loads to the acre, and we didn't use quite all there was in the yard. Saturday 5th I went over to Davis with Queen and got his Dad. and sowed his oats & harrowed them in for him. I sowed them by hand and as I never tried the job before and as the ground was rough I am afraid I made a poor job of it but it is so dry I don't think they will come any way. In the afternoon I brought Dock over here and with him and Queen rolled my peas and dished the manure into the corn ground. I also rolled the summer fallow which I have decided to do with the side-hill facing the school house. Sunday June 6 has long since past so I will have to continue in the same manner. The Bagleys were all out for dinner that day, and it rained a little. Monday 7th I went back over to Davis and with Queen & Doc. rolled his oats & harrowed them again and then came over here & harrowed & rolled my corn ground. Tuesday 8th I went over to help Frank plant his corn but it was such a rainy afternoon we didn't finish. Not much rain fell but there was and then a sharp shower would make no hurt shelter. We sought it twice at Pickfords and the first time he came back with us but it was too wet after the next shower. Dad came out here to mark out my field but didn't finish owing to the rain. I went over to Mrs. Saunders and as she had 70 as she was very anxious to put out I harrowed it.
