

**Wednesday, November 6**

311 DAYS PAST

*Thursday*

55 TO COME

**Patients Who Fail to Respond**

to well directed dietetic and hygienic measures often show prompt improvement when **Pepto-Mangan (Gude)** is added to the treatment. This is especially true of anemic convalescents. The appetite is improved, absorption of food is encouraged and the nutrition is enhanced.

**Weather**

*Cold, but bright.*

**Temp.**

*Dr. Davis was out to see the sheep. I race came home from school sick with a chill and sore throat. Dr Am<sup>c</sup> Lay is coming out this evening. Roads are muddy. Had to drive little buggy to day while other one is being fixed. Auntie has Ananda's sweater nearly done. Drove Anania*
