

...ed its future parks at a very low figure. London City Council in England has purchased large tracts of land for park purposes far ahead of present requirements, looking forward to still greater development of that great city."

Buy Land in the Right Place.

"The workingman must build where land is cheap, and there are districts where land can be purchased, but not very near to transportation. When the workingman buys a lot and builds a home, he is making a splendid investment. We sold land in the north-west district to workingmen at \$5.00 to \$7.00 per foot, and while we made a profit, the workingmen in most cases could double their money on their original investment. Real estate is as good an investment to-day as ever, only, my advice is, buy in the right place."

COUPLING FAULTY.

That is Explanation of Wreck Given by Witnesses.

Milton, May 1.—The inquest on the accident on the G.T.R. near Georgetown a week ago Sunday, in which Thomas Currah, farmer, of Bright, and J. D. Corry, brakeman, of Palmerston, lost their lives, was continued at Georgetown. The driver and fireman of the light engine which ran into the cattle train swore that it had been coupled to the rear of the train from Acton to a short distance from the scene of the accident, when it became uncoupled. They supposed that the coupling was faulty.

A Blow at The White Plague

Just think what it would mean if even half the deaths from consumption could be avoided. It is surely not too much to claim that at least this many cases are directly due to neglect to cure colds.

It is a simple matter to control a cold when you have Dr. Chase's Syrup of Linseed and Turpentine in the house for prompt use when the first symptoms appear. Many thousands have found this out by experience, and this is why no treatment for coughs and colds has anything like the sale in this country that this well-known medicine has.

Croup, bronchitis, whooping cough, sore throat, and chest colds soon yield to the healing, soothing influence of this great medicine. You can readily prove this, and will then understand why this treatment is so popular.

seen. The stimulus to such a being furnished by the demand building lots to house the increasing Toronto's population. Any man is forced to the conclusion the condition of the working man, even of the middle-class man, is pitiable. Either he and his family paying a rent too high for their room or they are living in three or cramped rooms in a flat with absolutely no opportunity for their child development.

"Those who are opening up the urban districts for building lots are doing therefore a philanthropic, even if their aims are entirely mercenary. They are supplying the facilities for every man to own his own home, an ambition which should be alike by all.

"This is unquestionably Canada's year. Toronto, together with Ontario is advancing rapidly in population. Last year's increase was 33,000. We already have indications that the increase in 1912 will be the greatest record.

"We have from seven to twenty enquiries for houses to rent daily, the demand cannot be met. Unforeseen calamities, such as the American war, I should say the market is pretty safe for another or four years. Such an estimate is based upon the fact that men in Ontario are becoming disgusted with conditions there, and are coming back in thousands, bringing their wealth with them. Toronto is to get her portion; Ontario has whatever benefits Ontario has benefited Toronto. I should not be surprised to see this city add 40,000 population in 1912."

Fought Bull With Pocket

Canadian Press Despatch
Regina, Sask., April 30.—With a six-inch jack-knife, J. S. Bell, a professional Regina grain-grower, fought a life nearly an hour with an infuriated bull in his pasture last night. The bull gored to death, expiring an hour before help arrived. He grabbed the bull by the horns and stabbed him in the throat, but each time was shaken and again attacked.
