

we didn't even get the stables cleaned out. Alfred came over this morning for awhile. This afternoon I drove Enah down town this afternoon to have her desoafitted at Mrs. Schenck's. I also practiced a little on my horn. Cloudy, windy and cold.

Wednesday October 29th

Dad. plowed all day and is now just half over the out stubble or just at the pile of staves, the top of which just sticks up on the surface of the ground, it took me nearly all day morning to clean out the stables, get in straw and cut wood, but this afternoon I picked apples, first I picked up all the good Canada Reds which blew down in night before last's wind, they blew down more than the other cool put them down cellar in one big box I picked an orange crate of Talman Sweetos, which will be enough for us, the pigs will likely get the rest, they are beauties I also picked what few sweet nussats I could but as they seem to grow mostly on very tips of the limbs I had to shake some of them down, there were very few hardly an orange crate full. It began to rain about three o'clock and although it didn't rain hard it was very steady and wet through everything I had to go out and help John put up some of the husked corn, the thins down a bit but as it began to rain didn't get it husked we didn't put it up. Mully got into the east end of the gully to night and jumped the fence and came right up the road to the barn.

Thursday October 30th

Dad. plowed all day and got on well. Jonas husked all day. I picked apples after I got the chores done. Mrs. M.: Side was here house cleaning all day so I had to heat carpet at noon. This morning Frank took a sack down to Preston, and they filled it with potatoes and left it east side the gate, I drove down and got it. Frank went back to look for his turkeys after school. He could not find them at their old roost in the gully but he saw R. J. Waterman who told him he had seen them Tuesday on the road in front of M. & Luen's Dick told us last night that Harry Dyer fell off a scaffold yesterday and broke his ankle. It has been sharper to day and rained a little this afternoon. Dad. should have gone down to a school board meeting to night but it is raining and dark as lightning

Friday October 31st

It froze quite hard last night and snowed a little. Robert John Waterman came over this morning just as Dad was getting out to work to get his heifer which had got in with our cows, as I was just going back to fix the fence where Mully and Jim got into the back field where we burned off the grass, I went with him to help him get her home, she was very quiet, so we had no trouble in driving her but it took us all morning to get her to stay on Robert John's place. we got her into I say's place but she jumped through the old
