233 DAYS PAST

133 TO COME

Definite and Dependable.

A distinctly apparent blood poverty, especially when verified by hematologic examination, requires a definite and dependable anti-anemic. **Pepto-Mangan (Gude)** not only restores the red cells to their normal condition but also creates new erythrocytes and materially increases their hemoglobin percentage.

Weather

Temp.

Hottest day I believe we have had yet - Dr. Pickering was out to Eugene + came here on his way back. Cecil Cox was over in morning to borrow camera + came over in afternoon to have his picture taken. Evelyn was over Sunday night and stayed the evening. Papa went to Mr. Cox's while Evelyn was here. Wilfred Bingham was here the afternoon and stayed for tea. It was something terrible trying to sleep at night heat was terrific. Papa slept down stairs in dining-room bedroom.

Manah wasn't driven.
