73 DAYS PAST

293 TO COME

The Vital Element of the Vital Fluid.

Normal metabolism fails unless the blood contains a sufficiency of iron-rich hemoglobin, the vital element of the vital fluid. Pepto-Mangan (Gude) furnishes, in immediately available form, the organic iron and manganese necessary to increase and encourage the oxygen-carrying capacity of the blood, by creating hemoglobin and red cells.

Weather

Temp.

Warm thawed such a
lot. roads bare in places.
John took Melba & had Polley
shoulder lanced again
led her & drove Billy. Drawing
manure all the afternoon.
Mella is staying all night
at Mrs McLeary. Sent Maude
her new white collar that I
made Saturday. Sent the
kidd for the first to day
Billy 5 - Polley 5
