

go over. I got Eph. Innes who is painting the school-
house to mix up some of my white lead and oil and I
started painting the house but didn't get much done. I
walked down to band practice to-night at least I
walked as far as the farm and got a ride from there
with Mr. Cornish but I walked home again. They are
getting ready for the big street Carnival on Wednesday
and I went up after band practice to get some
make up stuff from Harry Thom. Hat and sultry

Tues day August 11th

I didn't get up as early as usual this morning
and Frank and Ina were both here before we
were through breakfast. Frank brought the
waggon over to borrow some of my plank to lay
down on the barn floor for the separator as they
expected to thrash to-morrow but Alan came up today
to tell them they had changed their plans and were
going to thrash their own oats out of the field before
they moved out. I took 16 chicks out from the setting
lays and put them in a coop and then helped
Frank get the plank. We called in at Tupper's
and got my ladder which has been there ever

since I picked his apples two years ago. Frank &
I then went down to get a load of soft coal for the
engine. We had to go out along the pier after it
and while trying to make Joe & Queen turn around
out there Queen gave a scam back into a car
and smashed the cracked end on the old waggon
tongue. We backed the waggon up to the coal pile
by hand and nailed some old slabs on the tongue
so managed to get home with out trouble. This
afternoon Dad & I worked the rest of the hay which
Dad raked up this morning and got a load in
which we put over the horse stable. Frank spent
the after-noon fixing up the barn floor and granaries
and changed the car from the barn to the horse stable.
I rode Queen home to-night and drove Ina home
after tea, and then let Queen out but as she headed
straight for the line fence I was afraid to leave her
so brought her back. She was opposed to being
caught and as it was dark when I went after her
I ran into the barbed wire fence my self while
I was manoeuvring to catch her and cut my arm.
We sat up till about mid night for Mary to get
my costume completed and she made a horridly looking
pirate out of me. I in and made water
