80 DAYS PAST

286 TO COME

The Early Recognition of Cancer.

CARCINOMA OF THE LIP. A warty excrescence on the border of the lip or an ulceration with a hardened base and an infiltrated edge causing no pain in a person thirty-five years of age or over, and in whom the Wassermann test is negative, means most probably a beginning carcinoma. At this stage the lymph glands are not involved and a wide excision of the ulceration means practically 100 per cent. of cures.—Levin; Archives of Diagnosis.

Weather

Temp.

Warmer Snowing  
Quite hard this evening  
commenced about five.  
I went to Ayler for  
Medicine for Melba but  
the Dr. was gone to Lyons  
as a Mr Martin was badly  
hurt by falling off a load  
of hay. I have been piecing  
on the girls' velvet quilts  
Melba was in bed all day  
and John was a terrible  
cold. Billey 5" miles
