260 DAYS PAST

Tuesday

106 TO COME

Nose and Throat Aphorisms.

In antrum suppuration, if the nose is thoroughly cleansed, lowering the patient's head for five minutes will cause pus to flow into it.

In opening antrum place a piece of cotton saturated with 10 per cent. solution of cocaine under the inferior turbinate on affected side for ten minutes, then remove and place trocar under turbinate with point one inch from entrance to nostril, turn point upward and outward and push through into antrum. If right spot is selected no difficulty will be encountered. Then wash with solution desired—*Med Council.*

Weather

Temp.

Damp this morning
but turned out fine
Girls went to school Eugene
brought Melba home to
night, Mrs Van Wagner
came & took me to King's
John has been drawing
manure all day. Melba
brought Eugene's violin
home with her
