21 DAYS PAST

345 TO COME

Feb. 25, 1907.

Dr. O. J. Rochon, Matapedia, Canada, says:

"One of my patients had long been a sufferer from neurasthenia in its worst form. After trying several preparations of iron salts, with more or less effect, I decided to try your **Pepto-Mangan (Gude)**, and was so pleased with the results obtained that I feel safe in saying that it is the best preparation I have so far tried in my practice, where iron is indicated."

A terrible snow storm all day with a strong east wind. I have been in the house all day. Mrs George Davis came down through the storm a foot & stayed all the afternoon.
