295 DAYS PAST

Tuesday

71 TO COME

The Contributing Cause

of the Anemia which sometimes follows typhoid is often an "iron poor" milk diet, prolonged for several weeks. The resulting blood state, and the prostration incident to a long continued illness, urgently calls for hematinic and supportive measures during convalescence. **Pepto-Mangan (Gude)** eligibly supplies the essential material for hematic reconstruction and general constitutional revitalization.

Weather

Temp.

Rained hard
I washed girls' suit to
school. The Dr. Davis came
& took Melbas Darse's lamb's
horn off.
