

Sunday September 30th

Enah and I drove down to Church this morning and Frank walked down. Enah stayed down to dinner and to night to tea as she had to go to Victoria with the choir and to play in church to night. The held Harvest thanksgiving service over to say good bye to us and were here for half an hour or so. Dad. then went out to try plowing the rest of the steps along the side road. That Frank started in the spring for Carn. He plowed all the afternoon and said it was very hard but could be plowed. This afternoon Frank and I went down town and sold five baskets of tomatoes and got a load of shingles off Cousin Willie's barn roof. Windy & rather cool but sunny.

Monday October 1st

Dad sowed my experimental plots of wheat this morning and I disked them in. We then hooked on the plow. Just before we got out all the Mill man's came over to say good bye to us and were here for half an hour or so. Dad. then went out to try plowing the rest of the steps along the side road. That Frank started in the spring for Carn. He plowed all the afternoon and said it was very hard but could be plowed. This afternoon Frank and I went down town and sold five baskets of tomatoes and got a load of shingles off Cousin Willie's barn roof. Windy & rather cool but sunny.

Tuesday October 2nd

We got the ewes all over in the barn this morning and picked out seven that we thought were worthy of a place in the Simcoe show ring. Two aged ewes three shearlings and two ewe lambs we separated them and put the rest back in the orchard. Dad then went out to finish plowing and Frank and I started to trim the show sheep. Jack Martin's man came over to get Dad. to go and look at one of Jack's jerseys which had got bloated up on the frozen clover as it.
