

had spilled most of our milk when he was putting it in the mail box so he took the other pail and sent up a little more with the kids when they came to school but at that we only got about half what we should have. I just did chores this morning and did some squishing for May and this afternoon I spent some time at the dentist. He filled three more teeth for me. It was about six when I got home. May invited Mabel & Mrs. Walker over to tea so that she would have company while I went to hand practice to night. Mabel came but Mrs. Walker didn't get here till about seven o'clock and we were nearly thru for tea. I went down to practice and we had a good one although there weren't many out. There was an exhibition hockey match on between Brautford & Doran Intermediates. Brautford won 5-6. Cold day & frosty but fine.

Tues day February 23rd
May, Harry B. Gay and I all went down to Auntie for dinner to day leaving the baby in Ina's care as she was here washing. I had to go over to Gurn's before we left and get the milk as they didn't send it this morning. May went to the dentist before dinner and her tooth hurt her after wards. I went over to the Canning Factory

and contracted for 2 1/2 acres each of peas & corn. They have raised the price of peas to 40.00 per ton. I went and I set up a foundation for a book net for Auntie Alice this afternoon. May and Harry B. went up town after dinner with some egg for Amy and I went up later with I went for the mail and met them up there. We saw across Warric Banfield. He came home about five and I drove Ina home. Fine & sunny.

Wednesday February 24th
It was a cold night the mercury dropping to zero and there was a heavy fog this morning with the trees all coated with a beautiful rime. It has been a beautiful day, sunny with a little wind there was from the south but changing this afternoon to the east. I went over home this morning and Frank and I went down to get a load of coal for over there and I intended getting a load for here this afternoon but as they had nothing but the old soft coal we just got one load and each took half as I had said they expected some Alberta coal in right away and we heard to night that it came this afternoon. We came out here this afternoon with the coal and then went back and put a little jag of straw on and hauled it over to the horse stable. We took May and the kid over
