## Fracture of Neck of Femur.

TREATMENT. Apply extension apparatus. Control eversion of foot as follows: Thin a medium-sized pillow along one edge and slip this under limb, reaching nearly to heel. Pin securely to bandage supporting the extension straps, roll pillow firmly against limb, and pin at its other edge. Put firm roller bandage around pillow and limb. Pillow should be adjusted to raise heel a little, avoiding pressure on it. Finally, place smaller pillow under popliteal space and fasten to the larger pillow.—Totman.

Weather Fair & cold in the morning Temp.

Warmer this afternoon. John & I went out to Eugene's place this morning, got home about one, in the afternoon. Eugene went over to Ale's this afternoon for tea Aunt Bell walked up to Sunday school. John is over to Mark's to night. Valentine weighs 38 lbs This is the first time I ever saw the Eugene's place (not much in love with it glad I don't have to live there)
