253 DAYS PAST

113 TO COME

## An Editorial Tribute.

In the "Critic and Guide" for March, 1912, the editor, Dr. Wm. J. Robinson, in considering the standing of various preparations, says of Pepto-Mangan (Gude): "This perfectly ethical, palatable, stable and therapeutically efficient preparation . . . . is everything a ferruginous preparation can be. We have used it and are using it in our own family very frequently, and prescribe it in syphilitic anemia and in other conditions of exhaustion and blood impoverishment, with most excellent results. And that's all we ask of a preparation."

Weather

Temp.

A fine day cool to night. John Mulla & I was to a lumber to night, Mulla washed & I helped her iron. Maudie is sick at Mrs M<sup>c</sup>Leays. John is working the wheat ground. Mrs George David Aunt us learn the first we have had. Mark bowed his wheat! Mariah 5-
