

Saturday April 11th

I got around early this morning and got down town and went to business on the nine o'clock car. I visited Bramhill, Marston Carter, and the Salvation Army and finally telephoned Mrs. Porter. I asked all of them except Marston where I could get a girl to help in the house. But there seem to be none available. Mrs. Porter said she had had some saleswomen girls from the Barnum Humes in Toronto so I sent them a card when I got back to Aunt's. I came home on the 11 car and brought the wool sack and twine. When I took it in home Harry B. wanted so to come home with me that I brought him out for a visit and he was tickled pink to get home and to see Mary. I finished my ploughing this afternoon. Fine day but cool wind.

Sunday April 12th Easter.

Bill Donald came in quite early in the forenoon and took Ina home with him, so her sojourn with us has ended and although Mary will miss her very much it is a relief to be alone in the house again. After considerable deliberation we decide the best course to pursue was to take Gay down to Aunt's for a while

and Harry B. back to the farm and that would leave Mary just the baby to look after and she could take her time to the house work. Ina is coming again to wash on Wednesday. This afternoon I took Harry B. back to the farm and although he wasn't enthusiastic about going he went quite cheerfully and then I went on down and proposed to Aunt & Aunt Alice our scheme for wishing Gay on them. They had suggested it though so they were quite agreeable and Aunt said she would see Mr. Cornish to-night and try to get him to bring her out to-morrow after Gay. Fine a.m. Cloudy resp. m.

Saturday April 15th

Owing to working rather late at night and not getting up extra early mornings I have neglected making daily entries so must sum up in a general way the doings of the week. The major portion of my time has been taken up working on the pea ground. I got in very nice shape and went down Friday morning and got my seed from the factory. And Dad came out late in the afternoon and started to drill it for me. He quit about six and I went on till nearly dark with Ina & Belle but by then saw that I wasn't going to have enough
