

### Cancer of the Stomach.

The following rules are suggested upon which to base a positive diagnosis of cancer of the stomach:

1. If particles of tumor are found (in the wash water or in the tube) which, under the microscope, reveal the characteristic picture of a malignant growth.
2. The presence of a more or less large tumor with an uneven surface, belonging to the stomach and associated with dyspeptic symptoms.
3. The presence of a tumor associated with frequent hematemesis.
4. Constant pains, frequent vomiting, ischochymia, emaciation—all these symptoms being quite permanent and not extending over too long a period of time (six months to a year).
5. Tumor and ischochymia.
6. Emaciation, ischochymia, presence of lactic acid.
7. Constant anorexia and pains, not yielding to treatment, accompanied by frequent small hemorrhages of coffee-ground color.—*Dr. M. Einhorn; N. Y. Med. Journal.*

### Well Informed.

Little Willie Throop: "Pa, what does the title 'Dr.' or 'Doctor' come from, anyway?"

Mr. Throop: "Why, from the Latin word 'Dr.' or 'debtor,' used in making out bills, because doctors charge so much, Willie. Latin is a great language. When you wish to know anything in connection with the languages, always come to your father, Willie."—*Brooklyn Eagle.*
