look at the cattle. After he left. Frank and I went to the mill and got our chop and I went over to Suppers when I got home Supper was down town when I got there but came home before I left and said he thought he could manage his chores himself from now on. I borrowed a setting hen from him. So night I went down to hand practice. Al. Faulkner has been cutting up again. He got on a tear Saturday and went up Main St. in his car about dark at 40 or 50 miles an hour. ran into Bruce D. Queen and his wife who were coming down in a buggy and hurt Mr. D. Queen very badly. Cloudy and cool.

Tuesday April 29th

Frank and I went to Skinsee this morning in the wigger and got four bags of Irish Coddler potatoes for seed, some, oil cake, bran, & feed flour from Johnson. I went in to see Neff about my Dairy Profit competition and Frank went to get some ledger plates for the mower and some stamping powder but he couldn't get any. We had Joe & Queen and as Queen hasn't been out all winter we had to let her go pretty slowly and it was about three o'clock when we got home. Dad spent the day

115
I think helping Erich house clean. Nice day, sunny, cool breeze.

Wednesday April 30th

Frank and I gathered up most of the shingles off the lawn this morning and put them in the wood shed. Erich raked it this afternoon. Dad tore off some more shingles from the north side of the dining room roof as Charlie said Art would be over this afternoon and then he took the team back to borrow the side hill. Art came after dinner and he and Frank shingled all the afternoon. Dad took the team back and finished borrowing the side hill and I cleaned out the cow stables and then went back and dishes on top the hill and Dad came up and helped shingle. It doesn't work too badly but looks like more rain to night. Neff was in for a minute or two this morning and brought me some milk preserving tablets. I went down town to night. Nice day and sunny but eastern.

Thursday May 1st

It has rained most of the day and so we have done no outside work at all. I spent most of the morning filling in my Dairy profit and egg sheets.
