

## Like the Proverbial Pudding

the proof of which is "in the eating," is

### *Pepto-Mangan ("Gude")*

the therapeutic value of which is proven "in the trying." That this pleasant tasting, neutral combination of organic iron and manganese is an efficient "blood builder" in cases of Anemia, Chloranemia, Chlorosis, Rachitis, etc., is shown:

*First*—By the rapid improvement in the patient's color and general appearance.

*Second*—By the increased number of red blood cells and the greater percentage of hemoglobin, as shown by instruments of precision.

Do you want to make these tests for yourself? If so, we will send you a sufficient quantity for the purpose. In eleven ounce bottles only; never sold in bulk.
