300 DAYS PAST

65 TO COME

A Practical Hint.

Mueller has found that hemoptysis is almost invariably preceded for several weeks by a distinct rise in blood pressure. Whenever such a rise occurs in tuberculosis, he believes a hemorrhage is to be feared. His prophylaxis consists of rest with the administration of digitalis and morphine.—*Wien. Med. Woch.*

Weather

Very Cold

Temp.

A few small now drops.
Girls drove to school;
Froze very hard last froze
the water quite hard in
the horse bail, John
ploughed this forenoon
thrashed, for Adams
this afternoon & Joe did
to. Joe thrashed for Le Skinner
yesterday & this fore noon for
Billy & 1/2 him
