

out a few tomato plants which Frank found coming up from seed among the potatoes. I was to lazy to do any thing else much. Aunty came over about noon. This afternoon I put on a bathing suit and hooked up Joe and took the buggy down here to the grist mill and gave it a good washing. Lila came over just as I was starting so got on a bathing suit and went down with me and I think enjoyed herself immensely, going right up under the dam and all over. I got well washed off by getting under the stream that overflowed from the flume but there was awful force to it. I went down at seven to night and attended the Methodist Anniversary festival with the rest of the band. Dad, Dick, Frank & Ensworth all there. Aunty & Lila too & are up Liddens. We got home pretty fairly early and had a good time.

Saturday

Saturday June 28<sup>th</sup>

I plowed all day to day. Dad made three strike outs yesterday and I turned them under leaving about three feet for Dad. to finish up on each land. I got around three strike outs, and didn't do so very badly considering it was the first day

I had put in at the job never before plowing more than three or four rounds at a time. It seemed to go much better and I made a better looking job this morning than after dinner. I had old Harry and Joe Walker who made a pretty good team once they got started of but I generally had some trouble at the ends - as neither one of them much more than enough brains to make a square meal for a Chipmunk. Dad took Belle out to cultivate but she ~~was~~ <sup>is</sup> still had till Dad took her and Frank took the cultivator, when she worked like a charm and they continued operations all day in this manner but did not get quite over the field. About five o'clock the colts came up the lane and some way knocked down the bars into the field and took a race down the corn field and back, but we soon got them out. Aunty went down town to see Mrs. Robinson who I think is going away soon. They expected Quint home to night but he didn't come - but may be here yet for the first. Fairly warm but nothing like yesterday.
