147 DAYS PAST

SUNDAY

219 TO COME

The Necessary Stimulus.

A sufficient quantity of oxygen-bearing hemoglobin in the blood assures active absorption, assimilation and metabolism. **Pepto-Mangan (Gude)**, in conditions requiring general revitalization, contributes the essential hemoglobinogenetic agents, iron and manganese, in approximately the same organic combination in which they exist in the blood, and thus supplies the necessary stimulus to hemic reconstruction.

Weather

Temp.

Rained something
fierce, the ground was flooded
until about noon, but to
night it is about all gone.
They got me a new coal
oil stove last night. We
was home all day. Cecil
was over a little while.
The little hen in the summer
kitchen is hatching her chicks
