

to arrive here to morrow night. This after noon I just chared around and got all the loose straw around the stack packed in the barn. Helen and Mrs. Dunken were over to call on Cuah to night. It sprinkled rain this after noon and evening but didnt amount to much.

Friday September 15th

Dad. disked all morning but had to use Harry & Bell as old Nellie is quite lame. I did chores and then took walk over to ask Mr. Fleming if we might have his double tooth harrows to use on that piece across the gully to rake the grass roots out. He was plowing in his back field next Art Reynolds and I walked down along the creek & up through the woods. He said he wouldnt be using them before Monday, so that we might as well take them. I went over and talked to Art. till about noon. He was plowing too and Hays was disking. They got through seeding about a week ago but when they found this plowed so nicely, they thought they would put in a little more. This after noon I did up the chores then took Nellie & Joe down and got Mr. Flemming's harrows and took them back to Dad. He was just through disking so hooked on to them but they wouldnt work at all

as the grass just lunched up thick under them, so he went up and got the horse rake and tried to rake the grass up with it but it wouldnt work either so he is going over to morrow and harrow Martin Spring with cultivated. I took Ben I weys disks home and then put the team in. Frank had to go to Jarwin to day with a load of tomatoes, and had a great day of it. He and I went down town to night and saw Aunt Ruthie. All of Beckys family were down there. I was up for a little while to see May. Quite cold & cloudy.

Saturday September 16th

I had to take Elzitha up to Sam Thompsons again this morning and that took most of the morning as I was up there quite awhile and had an awful time getting her up there alone. She got away from me just at his gate and if it hadnt been for a little kid heading her off I dont know how I would have caught her. This after noon I did chores and took Mr. Flemming's harrows back with Joe and Nellie. Dad. Spring trowed all day and has it pretty well ripped up. He is going to try the rake again now that the grass is loose. Frank and I went down town to night I killed two of my crate fattened cockles this morning and took
