

Innes said they were the real thing and wouldn't take them green but will buy them threshed. We got home about two o'clock. After we had our dinner I went out and cut a little more hay with Joe & Harry and Dad. cultivated corn & potatoes with Belle. Frank picked raspberries for me this morning and helped Shelly hoe potatoes this afternoon. Mrs. Dr. Blaide was here all day and looked after Liddums this afternoon while Frank took old Nellie and went to the Methodist Bazaar. Jonas sent a couple of kids after Nellie. She never said any thing about wantin' her today so he had to wait till Frank got back. Cool & cloudy no sign of rain.

Thursday July 30<sup>th</sup>

I cut hay all morning and nearly finished the piece I went out after dinner and only got a few rounds cut when the rivets came out of the pitman rod and it came loose so I had to quit mowing. I hunked on to the rake and raked flat the remainder of the afternoon but didn't get over it all. Dad cultivated corn all day. Shelly didn't get over till noon and he built a lot of worm nests in the trees. Frank and he hoed some thistles in the corn and potatoes and started to cock up hay. But one called to them that the old sow was out and it got way down the road with all the little ones and it

took them a long time to round her up, so they didn't get much hay cocked. They saw some fellows on the road who told them that the army worms were on Charlie Dixon's & Charlie Clalland's places and were skinning the oats, that is a Charlie Dixon who lives way out Black Creek on the fourth concession. John W. es. c. came over this forenoon to see if he could借 the manure spreader but Dad told him he would lend it to him, so he came over after dinner and got it. Tonight Frank went down to the morning pictures show with Roy Bannister. An automobile came in after dark to night and I think Dad. is holding a post mortem on a dog or something I don't know who the people are, except their names are Simpson from Toronto. According to to-day's reports nothing short of a miracle can prevent a general war in Europe. Austria has already declared war with Servia and Belgrade is taken. Russia ~~is~~ is mobilizing an enormous army to support Servia and Germany. Britain and France are all beginning to <sup>do</sup> ~~do~~ squirm. Cool, cloudy &

Friday July 31<sup>st</sup>

We spent quite awhile this morning watching Dad operate on the dead dog. In day light he found the left side of it full of shot and dug eleven no. 5 shot out of its hind leg. They had gone right through the flesh but didn't wound
