356 DAYS PAST

10 TO COME

Contra-indications to Vaccination.

Two categories of children should be excluded from vaccination. The first includes those suffering from some grave ailment and with a much impaired nutrition. The second group includes children with eczema or who have had a generalized eczema within the past six months. This rule applies, of course, only if there is no epidemic of smallpox and if the children have not been exposed to a possible contagion.—*Goepfert; Therap. Monat.*

Weather

Temp.

A fine day
Snowing to eight p.m.
has been helping shed all
day. Frank Palmer quit
to day. Girls drove to school
I ironed & did another
washing & doing chores
between times. Maudie
finished a little handkerchief
for Bertie. Leavey to night.
